The IRP is the Company’s biennial report on its plans to adequately and reliably serve its customers over the next twenty years through a least-cost least-risk resource mix.

After the Company filed its 2019 IRP, it notified the Commission that it would need to revisit the accuracy of the IRP’s conclusions and findings.

The Commission now issues this Notice of Application. The Commission will issue a Notice establishing procedure and deadlines following the Company’s submittal of its updated 2019 IRP analysis.

NOTICE OF APPLICATION

YOU ARE HEREBY NOTIFIED that that the Company developed the 2019 IRP with input from the public through the IRP advisory council.

YOU ARE FURTHER NOTIFIED that in the 2019 IRP, the Company used AURORA, a long-term capacity expansion software, to develop resource portfolios for 24 future scenarios. The scenarios are based on three natural gas forecasts and four possible carbon emission adders that alternatively assume the Boardman to Hemingway transmission line project (“B2H”) would come online in 2026 or not come online at all.

YOU ARE FURTHER NOTIFIED that in a July 19, 2019 letter, the Company stated that after it filed its 2019 IRP, it discovered it would need to perform supplemental analysis related to the IRP’s capacity expansion modeling approach. The Company estimated that it could complete, review, and file an updated analysis by October 31, 2019.

YOU ARE FURTHER NOTIFIED that the Application is available for public inspection during regular business hours at the Commission’s office. These documents are also available on the Commission’s web site at www.puc.idaho.gov. Click on the “File Room” tab at
