Comment: "For a farmer to invest in solar panels, they are counting on a fair return from Idaho Power. They invested on the promise that they would receive a kilowatt credit for a kilowatt produced . We should be encouraging farmers to install more solar power, not discouraging them!"

Comment: "Please stop idaho Power from changing current net metering program for farmers until they establish a fair replacement program. Idaho farmers need a fair solar program that stabilizes their energy costs and builds resilience for the future."
