Company: Avista
mailing_list_yes_no: yes

Comment_description: I am a current customer of the above mentioned utility and I would like to voice my opinion on allowing them to make a rate increase. I do not feel that they are justified in making such a request in the first place as big establishments such as Avista generate a large amount of waste. Do they themselves recycle? Have they taken inventory and found that there are no areas of waste in over ordering pens and other supplies so they can be taken home by employees?

Past all that is the question of what services do they offer that are worth the rate increase? If they in deed had a rival would they be even asking for this increase? Look what they did to Rockefeller and that was nothing in comparison to what Avista does. One of the things that urks me the most is what they did during our energy needs that were reaching critical mass a few years back. Telling us we need to cut back on our usage (I personally think most should just because they are so wasteful) as our supplies are running low while they were selling large amounts to another state that was in critical mass. Then just after it was over they wanted a raise back then. Give me a break when are these money hungry fools going to quit? When we stand up and say NO MORE!!!!!!!!!!!!!!

Thank you for your time and consideration,
Char
