Comment: I am commenting about the sale of Avista to a Canadian company - Hydro One. I am against any such sale. DO NOT LET THIS HAPPEN. The sale of a utility company to any foreign corporation would be a violation of our NATIONAL SECURITY. It matters not that the country is Canadian. The ONLY entity that should be responsible for running power to OUR GRID should be a company that is wholly owned and operated by Americans! To even consider such a sale is insanity! I cannot believe that any state utility would be considered for sale. What kind of greed has brought this to fruition? Our Country has an electric grid that powers all our businesses and that power should ONLY be in the care, custody and control of an American corporation or an American Co-operative. No other nation will have the best interest of the American people at heart. The bottomline will always prevail and that is not going to be in the best interest of our people. I have read a bit about the company that wants to purchase Avista and they are not even treating their own Canadian citizens very well. How do you think they will be treating Americans? I would imagine with less care than their own people, who I understand have had HUGE increases in the cost of electricity! This deal MUST be stopped! IF you allow a foreign nation to control your power -- it will be very easy to be left POWERLESS! That is not something we want to have happen to us. PLEASE DO NOT ALLOW THIS SALE TO PROCEED. Sincerely, Carolyn Kiesz

**Comment:** I submit these comments on behalf of myself and as the Chairman of The North Idaho Water Rights Alliance which represents over 250 households, the vast majority of them are Avista customers in Northern Idaho. This proposed merger will significantly impact all of the customers in Northern Idaho and in neighboring States. Some of the impacts that are of great concern include but are not limited to; increased power rates, decreases in power reliability, fluctuations on the lake and river levels from the operation of the Post Falls dam, infringement upon existing private water rights and the 1927 water right to Lake Coeur d'Alene held by the State of Idaho for the benefit of all the people of Idaho. The economies of the region and the satisfaction derived from living in northern Idaho are at great risk of being diminished significantly from policies and decisions made by a company that has no vested interest in serving U.S. citizens. BC Hydro is a foreign government backed entity which has a sordid history of significantly causing harm to the customers that they have acquired through past mergers.

Credible concerns for the impacts from loss of ownership and control of the assets of the Avista Corporation such as; significant increased costs to residential and commercial customers, the potential problems that could arise during negotiations of the Columbia River Treaty currently in talks between the U.S and Canada, and the risks of losing significant Avista assets to a foreign government, which could have national security consequences should cause significant alarm to the Idaho PUC Commissioner's. It is imperative that the Idaho PUC denies the application for the proposed merger of Avista Corp. and BC Hydro One. To date none of these concerns have been addressed and no detailed information regarding the issues mentioned above has been disclosed by Avista or BC Hydro One. If the IPUC Commissioner's does not deny the merger outright they should at a minimum stop the transfer of the ownership and control of Avista assets to any entity other than another U.S. owned corporation that will operate the facilities in the best interests of the American People and in particular the citizen's that live in and rely upon the economies that are served by the Avista Corporation.

**Name of Utility Company:** Avista  
**Comment:** Idaho Public Utilities Commission,

I have done research on Hydro One in Ontario Canada. My research leads me to believe that Hydro One is interested in obtaining Avista to meet Canadian rules and to avoid fines because they are not currently in compliance. I fear the rate rebates & refunds that HO is offering are a meat smoke screen and that after the completion of this buyout I will face increases rates and decreased service. Hydro Ones record with current customers is atrocious at best. Further giving control of parts of our infrastructure to Hydro One is a huge concern. Our power transmission lines, dams & water are all at risk. PLEASE stop this atrocity.

Most sincerely Carla & Verland Woempner

Name of Utility Company: Mr.

Comment: Sirs: I have reviewed the material available on the Avista and Hydro-One merger and see no benefits to either company. I am against the merger because I do not believe a Canadian company should own any of our transmission equipment including:

No Hydro Electric generation equipment

No Gas fired electric generation equipment No Coal fired electric generation equipment No Nuclear electric generation equipment None of our transmission lines None of our transformers, both major or minor None of our metering equipment, both residential and commercial

I think it would be a huge mistake to allow a foreign government, or a foreign entity to own our own generation equipment.

Please do not approve this merger.

Thanks so much.

Jim Hollingsworth

**Name of Utility Company:** Avista

**Comment:** To whom it may concern,

I am respectfully requesting that you do your duty and prohibit the sale of a vital piece of American infrastructure to a foreign company. Not only will it subject American ratepayers such as myself to outrageous increases in cost, it will allow persons unknown to have a stake in America's power grid, a vital component of our infrastructure.

I do not believe I need to remind you that the Avista executives stand to profit personally and scandalously from this deal but those under the company's clutches will not. In fact, from the articles I have read about Hydro-One, they are a Canadian version of Enron, just there to gouge little old ladies and laugh about it.

It is my understanding that you are placed in this position to look out for the ratepayers since this is a legalized monopoly and the ratepayers cannot look for another electric/gas company. We are, effectively, trapped by this merger and it is your responsibility to stop this before it begins.

Thank you for your time and for doing what is right, Steven Neill

Comment: We are extremely concerned about Canadian based Hydro One purchasing Avista which is an American owned company.

In our opinion, little or no consideration has been made on the impact the proposed merger will have on the ownership and control of Avista's Dams, particularly the Post Falls Dam; lake and river levels, water rights; increases in our utility rates and all of the associated economies and our way of life.

Since Hydro One and Avista have not addressed these concerns or provided information to the PUC on these issues, we feel the merger application should be denied.

Blanchard Idaho, 83804

Name of Utility Company: Avista Corp.

Comment: I am writing to express my concerns over the purchase of Avista Corp. by Hydro One.

Idaho PUC is required to do its due diligence on the cost allocation. "Cost allocation is the process of identifying, aggregating, and assigning costs to cost objects. A cost object is any activity or item for which you want to separately measure costs."

I do not believe the Idaho PUC has adequately addressed claims that that there will be no increased costs to current Avista customers. Cost methodology is different from rate setting and I do not believe the Idaho PUC has shown the relationship between the cost allocation and rate formulas. If we as Idahoans can't see or be shown a simple factual cost allocation methodology prior to the merger, then the Idaho PUC has done citizens a great disservice.

Citizens are being told that there will be "benefits of scale". I am requesting what exactly these benefits of scale are and how they fit in to the cost methodology formula.

The foreign corporation Hydro One is regulated by the Canadian Government, which is compliant with the Paris Climate Treaty. Hydro One intends to implement their renewable energy policies through Avista, and costs will likely be passed on to Idaho citizens who are ultimately and unknowingly paying the rates. Hydro One currently charges almost three times the rates that Idaho rate payers currently pay. It also charges a 70% surcharge (known as the global adjustment fee) to pay its suppliers for its outrageously expensive green energy. The US is not a signatory to the Paris Climate Treaty and thus its citizens shown are to be bound by; penalized for it; or taxed through it as a result. It is the Idaho PUC's duty to protect Idaho citizens from this.

I am requesting the methodology details of how the cost allocation is tied to the rates, in relationship with the Paris Treaty, the current operation under Canadian law, and how the new company would be governed by the Green Energy Act and other international energy policies here in Idaho. I do not believe that the Idaho PUC has shown any substantial data insuring these policies would not increase costs to Idaho citizens through the cost allocation.

Another concern is Idaho citizens have repeatedly been told that the parent company would absorb costs ("spreading costs") and there will be credits applied so there would be no increase. What happens to rates and Idaho citizens' abilities to fight future rate increases after these credits are gone or expired?

Hydro One is currently charging three times the rates in Canada that we are paying here in Idaho. If Canadian law requires the new Avista to operate under Paris Treaty (which is more expensive) how will the new Avista avoid passing that cost on to Idahoans? How can the new Avista spread costs one direction and after the merger, not spread costs for Paris Treaty compliance in another direction?

Dear Commissioner Kjellander,

Thank you for your recent tour of North Idaho, meeting with us citizens and your courage, vision and leadership in preserving American sovereignty over our Idaho waters and your work on our behalf in the Idaho legislature. I can tell you that everyone I have spoken with, across the entire political spectrum desires to keep our precious water resources in American hands.

It took unbelievable courage to stand up to powerful interests but that is keeping with our proud heritage here in Idaho. We applaud your willingness to do so. Just know sir, that we the citizens of the five northern counties have your back. My two year old granddaughter Adaline will learn of what you preserved for her generation. As my little thank to you I created this special poster to commemorate you beautiful heart and keeping our waters free and wild.

Please let me you if I can be of any help to you telling your story.

Warmest regards,

Comment: My family is against the merger/acquisition of Avista by Hydro One. No one can predict what rates Hydro One would charge in the future. Judging by past performance, the IPUC usually grants rate increases that are outrageously high if the utility asks for the moon. We do not want outrageous increases in our bills. It is unconscionable that a state commission would ascent to this open ended, theft of our infrastructure with unknown " GOLDEN SHARE HOLDERS", unknown formulas for balancing debts between the companies, loss of control of 13 dams and the water flows and water rights, when the US is sitting across the table from Canada renegotiating the Columbia River Treaty. Who is minding the store? Surely any agency that approves this pack of smoke, mirrors & manipulations does not truly protect the citizens from harm . Do the tight thing and disallow this theft by payoffs and outright lies.
