Applicant seeks authority to provide all forms of intrastate local exchange and interexchange telecommunications services including:

1. Interexchange (switched and dedicated services):

- A. 1+ and 101XXXX outbound dialing;

Applicant has no current plans to install facilities in Idaho. If ADT installs facilities in Idaho, it would probably use the following or a similar configuration of equipment: ADT will provide voice and high speed data services through a combination of the latest technology switching and transport media, ADSL/SDSL transport and Internet service equipment and the latest Optical multiplexer DAC's configurations. The switching system consists of a central processing and control complex capable of interconnection as a peer to the incumbent as well as competitive local exchange companies. The hub portion of the switch will interconnect with the public switched network on Signaling System 7 ("SS7") or Feature Group D ("FGD") facilities. The system's remote module capability will allow properties to be served in a manner that provides the exchange of appropriate signaling, control and calling/caller information to the network in accordance with network standards and specifications. Additionally, these services will be delivered over a combination of delivery mechanisms through incumbent local carriers' unbundled loop network, both copper and fiber and transport networks, as well as via ADT constructed facilities. Applicant intends to provide service upon certification and finalization of interconnection agreements with the LECs.

Copies of Applicant's Balance Sheet and Profit & Loss Statement as of December 31, 2008, Exhibit 3, are being filed in a separately sealed envelope marked "Confidential and Proprietary".

10.) A map showing where Applicant is proposing to provide service is attached hereto as Exhibit 4.
